

easily handled. Each unit measures 50 x 50 x 50cm (1.65 x 1.65 x 1.65ft) and has a standard freeboard of 40cm. Blocks are connected in four places using lugs and a bolt for security.

Blocks can be connected to create any desired layout arrangement of any size and can also be used to replace or extend existing pontoon systems. The blocks are salt water and acid resistant and no maintenance or cleaning is required. Systems can remain in place throughout the year or can be stored away in single modules. When in use, the pontoon system is slip-proof, has no sharp edges and, of course, cannot splinter or rot.

Banish mould in shower blocks

Flag Paints has used biocide technology for many years to produce a complete range of paints to treat and banish the growth of black mould and similar contamination on internal and external walls.

No longer do changing rooms, shower blocks and laundry areas in the marina or club house need to suffer from unsightly black specks and external walls can be protected from green or black algal growth.

Available under the Asipo brand, a range of eight different treatments is offered including a strong algicidal wash, internal matt or silk emulsion paints and all-weather coatings.
